

Technical Support Guide

1. Overview

This guide helps resolve common technical issues and explains the support process.

2. Login Problems

Verify your username and password. Use the password reset option if needed.

3. Password Reset

Click 'Forgot Password' and follow the instructions sent to your registered email.

4. Browser Compatibility

Use the latest version of Chrome, Edge, Firefox, or Safari.

5. Internet Connectivity

Check your internet connection and retry after reconnecting.

6. Application Errors

Capture the error message or screenshot before contacting support.

7. API Errors

Verify API keys, endpoints, permissions, and request formats.

8. Performance Issues

Close unnecessary applications, refresh the page, and clear browser cache.

9. File Upload Problems

Ensure the file type and size meet the supported requirements.

10. Software Updates

Keep your browser and application updated to the latest stable version.

11. Security Recommendations

Enable multi-factor authentication and never share passwords or API keys.

12. Data Backup

Regularly back up important business data and documents.

13. Escalation Process

If an issue cannot be resolved, it will be escalated to the technical team.

14. Support Ticket Guidelines

Include order number, screenshots, logs, device details, and reproduction steps.

15. Contact Technical Support

Contact the support team via email or the customer portal for unresolved issues.
